Developer Catalog
All services
Browse the catalog to discover, deploy and connect to services
Database
Browse the catalog to discover database services to add to your application
Operator Backed
Browse the catalog to discover and deploy operator managed services
Git Repository
Import from Git
Import code from your Git repository to be built and deployed
Sharing
Project access allows you to add or remove a user's access to the project
Eventing
Container images
Deploy an existing Image from an Image registry or Image stream tag
Application portability
Export application
Replicate your application by exporting a zip file, which can be imported to another project or another cluster
From Local Machine
