Quick setup — if you've done this kind of thing before

Set up in Desktop or HTTPS SSH https://github.com/nikhilzambare24/GITpractice.git

Get started by creating a new file or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore.

...or create a new repository on the command line

```
echo "# GITpractice" >> README.md  
git init  
git add README.md  
git commit -m "first commit"  
git branch -M main  
git remote add origin https://github.com/nikhilzambare24/GITpractice.git  
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/nikhilzambare24/GITpractice.git  
git branch -M main  
git push -u origin main
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

Import code

ProTip! Use the URL for this page when adding GitHub as a remote.
